

GLASS DOOR LOCK

GS-GL3

LOCKS

- Cylinder lock designed for glass showcases.
- GS-GL3 lock is compatible with GS-GH5 hinge.
- Thick deadbolt provides added security and quick, easy installation, the only drilling required is a round hole.
- Locking direction can be changed by turning the case lock and cylinder.
- 360° key rotation.
- Maximum 120 key changes.
- Key removable when unlocked. Key not removable when unlocked is also available.
- Key not removable option allows key to be used as a pull or knob.
- Strike plate acts as a door stopper for stable locking operation.

Application	Door Material	Key Changes	Master Key	When Unlocked	Total Lock
Single Swing Door	Glass	120	-	R: Key Removable	2650 Series*
				NR: Key Is Not Removable	

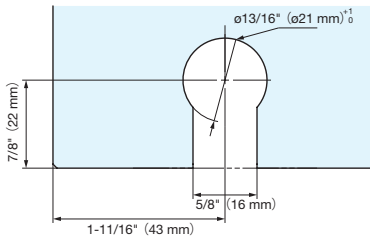

*Only compatible with 2650 models for 22 mm & 30 mm thickness boards. GS-GL3 key is not accessible for 16 mm board thickness

Round Dead Bolt

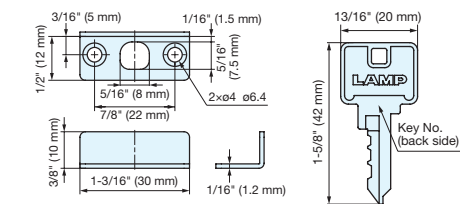

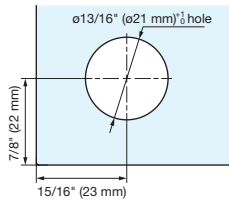

Only processing required for boards is a $\phi 10$ mm drilling.

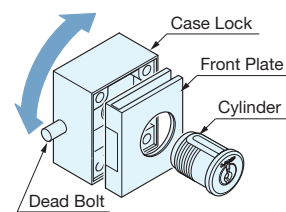

Cut Out Dimensions Tempered Glass

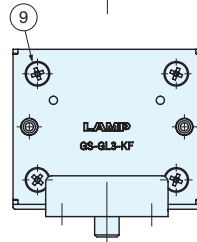

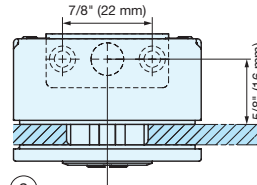

Cut Out Dimensions (Dead bolt direction: down)

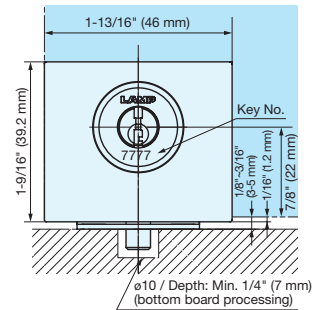

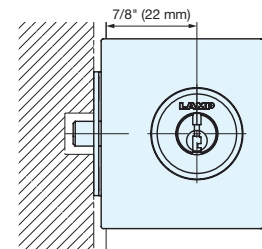

Change Locking Direction

1. Remove the cylinder from the front plate.
2. Turn the case lock and front plate to the desired direction.
3. Fix them with nuts or screws.
(Make sure the LAMP logo on the cylinder is always in the right direction.)
